

TACK AND EQUIPMENT DISINFECTING PROTOCOL

Please read thoroughly before proceeding to Step 1

All of the items you need for your lesson are located at your station including a halter and leadrope, brushes and all tack for your lesson. Please do not enter the tack or feed rooms. If you are missing a piece of equipment please alert your instructor.

Leasers are permitted to enter tack and feed rooms on a one-in, one-out basis, but must use grooming equipment provided in leaser's station (6), or personal equipment. All equipment must be disinfected according to the following guidelines.

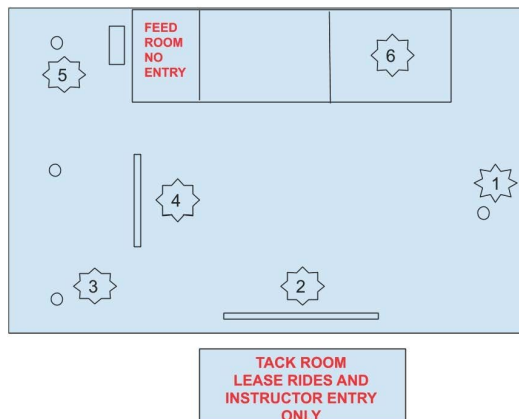

Before your ride:

Step 1: Wash your hands at station located at top of the lane

Step 2: Lesson students, find your station at the board outside of the lesson area. Leasers use station 6.

Step 3: Use the equipment, including halter and leadrope provided at your station.

Step 4: Use disinfectant on gates (the bottles hanging next to the lesson field gates). After you have your horse out of the field, please use it to spray ANY gate bars and latches that you come into contact with along the way.

Remember to repeat this step when turning your horse back out after your ride.

After your ride:

Reference the laminated sheet inside your bucket for detailed instructions on how to disinfect your area and tack.

When Leaving: For your safety, please use handwashing station at top of the lane again when leaving the property.
